YOUR PARTNER IN FRAMES

Our company was founded in 1888 as a wholesaler of wooden frames. In 2009, we started the production of aluminium textile frames. Since the introduction of these frames, we have experienced an unprecedented growth. From our production locations in the Netherlands and United Kingdom, we now deliver our products to all European countries and far beyond.

We are the specialist in aluminium textile frames. We only supply our products through resellers. These are distributors, large format printers, sign makers as well as stand and interior builders. We have a wide range of profiles in which fabrics or printed textiles can be fitted. That means that there is a suitable profile, for every application. The textile frames are available with and without illumination. They can be mounted on the wall, placed freestanding using baseplates or suspended from the ceiling.

What sets us apart?

THE SPECIALIST IN ALUMINIUM FRAMES

Leader in the European market

Within ten years, we have become European market leader in aluminium textile frames. As a company, we stand for innovation, quality and service.

Customised solutions

We can create any type of frame with seven double mitre saws, a CNC and a bending machine. In combination with our extensive range of profiles, there is always a suitable solution.

Sizeable inventory

We have more than 350 km of aluminium profiles in stock. In combination with a high production capacity, this ensures short delivery times and excellent service.

Worldwide delivery

We deliver our aluminium frames worldwide. With our customer service in three different languages, we can also provide an excellent and accessible service abroad.

The advantages of **ALUMINIUM FRAMES**

Available in any desired size

Each frame is custom made for you.

Interchangeable fabrics

Change the textile print or fabric quick and easy and create a new look in a room in no time.

Compact packaging

The installation of a textile frame is quick and easy. This makes compact packaging possible, allowing affordable transport.

Aluminium is 100 percent recyclable

All products can be returned to our company at the end of their lifecycle for a second life.

TEXTILE FRAMES

We have a wide range of aluminium textile frames, both single and double-sided. These frames allow you to change your advertising quickly and easily. An aluminium textile frame ensures high attention value, is durable and versatile. An aluminium textile frame can be mounted on the wall, placed freestanding using baseplates or suspended using suspension cables. A textile frame is lightweight and designed for years of intensive use.

Textile frames

1.1 SINGLE-SIDED

Our single-sided textile frames can be attached to the wall or suspended from the ceiling. Attach the frame to the wall with screw fastening or use wallmounts. Ceiling mounts can be used to suspend a frame from the ceiling.

Eco 15

The most cost-effective profile for wall mounting.

✓ Optional: pre-drilled

Simple 19

A popular budget profile for wall mounting.

✓ Optional: pre-drilled

Slim 25

A sturdy and cost-effective profile for wall mounting.

✓ Optional: pre-drilled

Heavy 26 45°

Wall profile that gives the print a floating effect.

Heavy 27

An extra strong profile for wall or ceiling mounting.

Single 50

A sturdy, single-sided profile that can be used in combination with acoustic material.

Cabinet 30

An affordable profile that is suitable for installation in a niche or frame.

All our profiles have a white label product sheet. Download it from the product page.

Quick and easy

MOUNTING OPTIONS

The installation of a textile frame is quick and easy. By simply connecting the corners and placing the textile print in the frame, the desired expression is made in no time. This makes compact packaging possible, allowing affordable transport of large formats.

Three attachment options

- ✓ Wall mounting
- ✓ Suspended from the ceiling
- ✓ Built-in

1. Connect the corners

Slide the lockset into the profile and tighten the screws to connect two profile parts and create a corner.

2. Place the frame

Mount the frame directly onto the wall or by using wall mounts. Hanging from the ceiling is also an option.

3. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Extend the frame - optional

Long lengths are often delivered in two or more parts. The different parts can easily be assembled with the corresponding extension set.

Reinforces the frame - optional

To guarantee the stability of large format frames, stabilizers get mounted in the frame that acts as reinforcement.

Did you know that all our frames come with a QR code that links to the white label installation manual?

Attachment option 1

DIRECT WALL MOUNTING

Mount the textile frame directly on the wall. To simplify the installation, the frame can also be supplied with pre-drilled holes, called punch holes. This makes the pre-drilled frame quicker to install.

Attachment option 2

WALL MOUNTING BY USING WALL MOUNTS

Attach the wall mounts on the wall first. Then lift the whole textile frame over the wall mounts and rest it on the brackets in the designated track.

This method is suitable for the **Slim 25**, **Heavy 26 45°** and **Heavy 27** profile.

*See page 133 for
all wall mounts* 

Attachment option 3

SUSPENDED WITH CEILING MOUNTS

The **Slim 25** and **Heavy 27** frame can be suspended by installing ceiling mounts, which can be ordered separately.

*See page 134 for
all ceiling mounts* 

Attachment option 4

TEXTILE FRAME FOR INSTALLATION

The **Cabinet 30** frame is a specially designed textile frame that is suitable for various built-in solutions. By drilling the frame to the inside of the niche or frame every 30 cm, the entire opening can be covered by the textile print with its silicone tendon.

Textile frames

1.2 DOUBLE-SIDED

A double-sided textile frame can be used both freestanding and suspended. Create eye-catching displays in stores and showrooms or attractive partition walls that look perfect in any office.

Double 44

The most popular profile for a freestanding and suspended application.

✓ Open and closed

Double 50

A sturdy and versatile profile that can be used in combination with acoustic material.

✓ Open and closed

Double 80

An extra-strong double-sided profile suitable for extra-large formats.

✓ Open and closed

Double 100

A double-sided profile for a freestanding and suspended application.

All our profiles have a white label product sheet. Download it from the product page.

Quick and easy

MOUNTING OPTIONS

The installation of a textile frame is quick and easy. By simply connecting the corners and placing the textile print in the frame, the desired expression is made in no time. This makes compact packaging possible, allowing affordable transport of large formats.

1. Connect the corners

Slide the lockset into the profile and tighten the screws to connect two profile parts and create a corner.

2. Place the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

3. Attach the frame

Place the frame freestanding or hanging with the appropriate installation options.

Extend the frame - optional

Long lengths are often delivered in two or more parts. The different parts can easily be assembled with the corresponding extension set.

Reinforces the frame - optional

To guarantee the stability of large format frames, stabilizers get mounted in the frame that acts as reinforcement.

Blockout fabric - optional

The blockout fabric prevents sunlight, artificial light and stabilizers from shining through the fabric, leaving both sides of the print perfectly visible.

Did you know that all our frames come with a QR code that links to the white label installation manual?

Attachment option 1

MOUNTING OPTIONS

Create unique suspended banners for in every showroom or above an exhibition stand. You can use suspension eyelets or suspension cables to quickly and easily hang up a double-sided textile frame.

*See page 134 for
all ceiling mounts* 

Ceiling mount

Suspension cable

TUV

Attachment option 2

FREESTANDING OPTIONS

Create eye-catching displays in shops or unique partitions that look perfect in any office, showroom, or exhibition floor using our baseplates. The baseplate acts as a footrest under the profile. We have baseplates available in different types, thicknesses, and sizes.

*See page 130
for all baseplates* 

Aluminium tubular frame

1.3 OUTDOOR

Tubular frames are a well-known concept in the market: a super strong frame with an industrial look. They are suitable for all types of advertising, both indoors and outdoors and are durable. The aluminium tubes are used in combination with our steel connectors. A banner with rings can be stretched into these using tensioning elastics.

Tube 42

Tubular frame for indoor and outdoor use.

All our profiles have a white label product sheet. Download it from the product page.

Textile frames

1.4 KEDER

With the **Cord 43**, also called a 2-channel keder frame, it is possible to create banners quickly and easily. Only two aluminium Cord 43 profiles are required. The print is inserted at the top and bottom of the profile. The endcap ensures that the fabric stays in place.

Cord 43

Quickly and easily create suspended banners.

All our profiles have a white label product sheet. Download it from the product page.

Attachment option

HANGING KEDER FRAME

This profile can be provided with a textile fabric with a round keder tendon. The fabric with the flexible thick tendon is placed in the aluminium profile and finished with the supplied endcaps. The banner tendon should have a minimum thickness of 7.5 mm and a maximum thickness of 13 mm to be placed in our aluminium keder frame.

LED FRAMES

A LED frame is a textile frame fitted with LED lighting. A LED frame adds dimension and atmosphere to a room and gives it a contemporary look. Due to the development of various LED technologies, our lightboxes come in any desired size.

2.1	LED technologies	42
2.2	Single-sided	50
2.3	Double-sided	54

2.1 LED TECHNOLOGIES

We have various LED technologies developed. Depending on your needs, there is always a LED frame that fits. Let your message stand out with one of the featured LED technologies.

EFKA is the absolute

SPECIALIST IN LED FRAMES

It is often difficult to select a well-lit frame, what is the best choice for your specific situation? We explain to you which LED technology is best to use, depending on the application. There is always a suitable solution for every situation!

 **TWO-YEAR WARRANTY**

 **CE CERTIFIED**

 **CUSTOM WORK**

Edge-lit

EDGE-LIT LED TECHNOLOGY

Illuminates the textile print from the side using powerLED.

GOOD QUALITY/PRICE RATIO

Good light distribution for small to large formats, with a full-colour print.

ECONOMICAL TO TRANSPORT

The components of the frame can be sent as a flat package, making the frame economical to transport.

RELATIVELY LOW POWER CONSUMPTION

An advantages of Edge-lit is the relatively low power consumption.

1. Connect the corners

Slide the lockset into the profile and tighten the screws to connect two profile parts and create a corner.

2. Connect the plugs

Put the pre-assembled LED strips and drivers together.

3. Attach the frame

Mount the frame directly onto the wall or by using wall mounts. Hanging from the ceiling is also an option.

4. Place the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Place blackout fabric - optional

The blackout fabric can be placed on the inside of the frame for better light reflection. Place the fabric into the designated groove.

Reinforces the frame - optional

To guarantee the stability of large format frames, stabilizers get mounted in the frame that acts as reinforcement.

Did you know that all our frames come with a QR code that links to the white label installation manual?

LED on Dibond

LED PRE-MOUNTED ON DIBOND

Illuminates the textile print from the back with LED pre-mounted on a dibond plate.

NARROW FRAMES POSSIBLE

The frame can be made extremely narrow, from a depth of 60 mm.

TWO LIGHT INTENSITIES AND DIMMING

You can choice between Bright LED and Super Bright LED, three light colours and the option to dim the light.

QUICK INSTALLATION

LED on Dibond frames can be installed easily and quickly as they get delivered pre-assembled.

1. Place the frame

Attach the frame to the wall.

3. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Slide the parts together - optional

Long lengths are often delivered in two or more parts. The different parts can easily be assembled with the corresponding extension set.

Connect the plugs - optional

Put the pre-assembled LED strips and drivers together.

Did you know that all our frames come with a QR code that links to the white label installation manual?

LED on Stabilizer

LED MOUNTED ONTO STABILIZERS

Illuminates the textile print from the back with LED mounted onto stabilizers.

SUITABLE FOR LARGE FORMATS

LED on Stabilizer offers satisfying illumination in all cases and is suitable for extra-large formats.

TWO LIGHT INTENSITIES AND DIMMING

You can choose between Bright LED and Super Bright LED, three light colours and the option to dim the light.

ECONOMICAL TO TRANSPORT

The components of the frame can be sent as a flat package, making the frame economical to transport.

1. Connect the corners

Slide the lockset into the profile and tighten the screws to connect two profile parts and create a corner.

2. Install the stabilizers

Place the stabilizers, with LED, on the indicated positions.

3. Connect the plugs

Put the pre-assembled LED strips and drivers together.

4. Place the frame

The frame can be mounted on the wall, placed freestanding using baseplates or suspended using ceiling mounts.

5. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Did you know that all our frames come with a QR code that links to the white label installation manual?

LED frames

2.2 SINGLE-SIDED

We have a wide range of single-sided LED frames specially designed for wall mounting, freestanding (where one side is illuminated) and in some cases, ceiling illumination. Thanks to the clever flat-tendon system, the white or printed fabric is quick and easy to change, so you can create a new look and feel in no time.

LED frames

2.4 DYNAMIC LED

Thanks to dynamic LED, you can practically bring your textile print to life. A video animation controls the illumination and therefore offers the possibility to create dynamics in a static environment. It's the perfect way for putting your brand, product, or message in the spotlight in a creative way. We have dynamic LED available in RGB (colour) and white.

All our profiles have a white label product sheet. Download it from the product page.

Animations

LED FRAME WITH DYNAMIC LED

By using pre-programmed animations that are matched to the fabric, dynamic LED can highlight a message in an even more targeted way.

Dynamic LED

Create impressive animations

Dynamic LED

Create impressive animations

LED frames

2.5 TUNABLE WHITE

With tunable white, both the light colour and brightness can be adjusted as desired. This makes it possible to make a room multi-functional with for example: burning bright, neutral light during the day and switching to mood lighting in the evening.

All our profiles have a white label product sheet. Download it from the product page.

LED frames

2.6 POP-UP LEDBOX

The Pop-up LEDbox is a modular double-sided aluminium frame with efficient LED lighting. The compact LED frame is available in the size 1000 x 2000 mm. The frame can be assembled in just five steps without using any tools. It can be used as a pop-up exhibition wall, roll-up banner, mobile display, billboard and as signage at temporary locations.

Pop-up LEDbox

Double-sided pop-up LED frame, with a size of 100 x 200 cm.

Quick and easy

POP-UP LEDBOX

The **Pop-up LEDbox** is designed for quick transport and can be assembled without tools in just five steps. The Pop-up LEDbox is lightweight, making it easy to transport. You can connect several of these frames.

1. Turn the baseplates

Turn the two baseplates that are attached to the bottom of the frame.

2. Connect the bottom corners

Mount the two lower vertical parts of the frame to the lower part and click the corners into place with the pre-assembled mounting system.

3. Connect the top corners

Now assemble the three upper frame parts together to create a U-shape. Use the numbering on the frame as guideline.

4. Connect the bottom to the top

Place the mounted U-frame on top of the groundframe and make sure to connect the lighting units.

5. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Connect several frames - optional

Combine and connect several frames with the supplied connectors.

CURVED FRAMES

Nowadays, curved textile frames are the frames that can literally and figuratively make the difference.

A curved frame adds playfulness, but it can also be used as a sleek eye-catcher. Curved textile frames are very versatile: single and double-sided, lit and unlit and in various shapes.

All our profiles have a white label product sheet. Download it from the product page.

3D textile frame

CARRE 44 SUSPENDED & FREESTANDING

You can create unique 3D banners with the **Carre 44** profile. The combination with the **Double 40** profile makes it a sturdy and stable whole. The Carre 44 profile is perfect for both freestanding and suspended use. The profile is safe to use up to a height of 2300 mm. The width has no restrictions. For a larger format, we recommend the **Carre 80**, as it is an even thicker and sturdier profile.

*See page 134 for
all ceiling mounts* 

1. Connect the corners

Slide the lockset into the profile and tighten the screws to connect two profile parts and create a corner.

2. Place the endcaps

Finish the corners neatly by simply sliding the endcaps into the appropriate holes.

3. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Did you know that all our frames come with a QR code that links to the white label installation manual?

3D textile frame

CARRE 80 SUSPENDED & FREESTANDING

You can create unique 3D banners with the **Carre 80** profile. The combination with the **Double 80** profile makes it a sturdy and stable whole. By using stabilizers, almost any format is possible. By using ceiling mounts and/or suspension cables, the frame can be suspended from the ceiling. As a result, the Carre 80 profile is perfect for both freestanding and suspended use.

*See page 134 for
all ceiling mounts* 

1. Connect the corners

Slide the lockset into the profile and tighten the screws to connect two profile parts and create a corner.

2. Place the endcaps

Finish the corners neatly by simply sliding the endcaps into the appropriate holes.

3. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Did you know that all our frames come with a QR code that links to the white label installation manual?

3D textile frame

QUATRO 50 SUSPENDED & FREESTANDING

You can create unique 3D banners with the **Quatro 50** profile, including large and sturdy cubes. The tendon fabric can be attached to all sides. The Quatro 50 profile is sturdy due to its shape, and it is easy to assemble with the corner connectors. By using ceiling mounts and/or suspension cables, the frame can be suspended from the ceiling. As a result, the frame is perfect for both freestanding and suspended use.

*See page 134 for
all ceiling mounts* 

1. 2-way corner quatro 50

Use the 2-way connector as a two-sided corner piece.

2. Connect the corners

Connect the corner piece with the Quatro 50 profile. Then tighten the screws with the Allen key provided.

3. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

1. 3-way corner quatro 50

Use the 3-way connector as a three-sided corner piece.

2. Connect the corners

Connect the corner piece with the Quatro 50 profile. Then tighten the screws with the Allen key provided.

3. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Did you know that all our frames come with a QR code that links to the white label installation manual?

3D cube frame

CUBE 65 **SUSPENDED & FREESTANDING**

The **Cube 65** is specially designed so that textile prints can be placed on all sides. The textile print fits seamlessly into the corners of the configuration for a perfectly sleek design. The profile is suitable for small formats. For a larger format than 2x2x2 metres or an extra sturdy cube, we recommend the **Quatro 50**, **Carre 44** or **Carre 80** profile.

1. Lock cube 65

Use the lock cube 65 as a three-sided corner piece.

2. Connect the corners

Connect the profile with the lock cube 65 by placing it in the Cube 65 profile.

3. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Freestanding

3D frames

4.2 ILLUMINATED

With our illuminated 3D profiles, you can create eye-catching LED frames. The fitted textile print is visible from several sides and perfect for both suspended and freestanding use. The construction also lends itself to the creation of fully exhibition stands.

Carre 160

A 3D profile to create striking illuminated L, U and O configurations.

✓ Edge-lit and LED on Stabilizer

Lightbox Double 160

All our profiles have a white label product sheet. Download it from the product page.

3D LED frame

CARRE 160 SUSPENDED & FREESTANDING

You can create spectacular illuminated walls with the **Carre 160** profile. The combination with the **Lightbox Double 160** profile makes it a sturdy and stable whole. By using stabilizers, almost any format is possible. By using ceiling mounts and/or suspension cables, the frame can be suspended from the ceiling. As a result, the Carre 160 profile is perfect for both freestanding and suspended use.

*See page 134 for
all ceiling mounts* 

1. Connect the corners

Slide the lockset into the Lightbox Double 160 profile and tighten the screws to connect two profile parts and create a corner.

2. Place the Carre 160 profile

Place the cut-to-size Carre 160 profile on the vertical part of the lockset and attach the lockset to the Carre 160 profile with the supplied fastening set.

3. Attach the textile print

First attach the silicone tendon in the corners of the groove. Then press the print into the rest of the groove.

Did you know that all our frames come with a QR code that links to the white label installation manual?

PANEL FRAMES

Our Panel hanging and L-shape can be used to hang panel material, like Dibond or Forex. Whereby the frame of the Panel hanging is not visible, but with the L-shape, it serves as a frame.

5.1 Panel hanging	104
5.2 L-shape	106

Panel frames

5.1 PANEL HANGING

With the **Panel Hanging 18**, also known as a blind suspension system, you mount panels with a smooth surface to the wall. Because the frame is not visible, the print seems to float, and this way, you create a 3D effect.

Panel Hanging 18

For mounting panels without the frame being visible.

Panel frames

5.2 L-SHAPE

Add the finishing touch to the panel material. The print is placed within the aluminium frame. The small space between the frame and the print gives a spacious feeling, and the simple contemporary design makes the print stand out.

L-shape 17,8

For framing a panel, with a depth of 17.8 mm.

L-shape 30

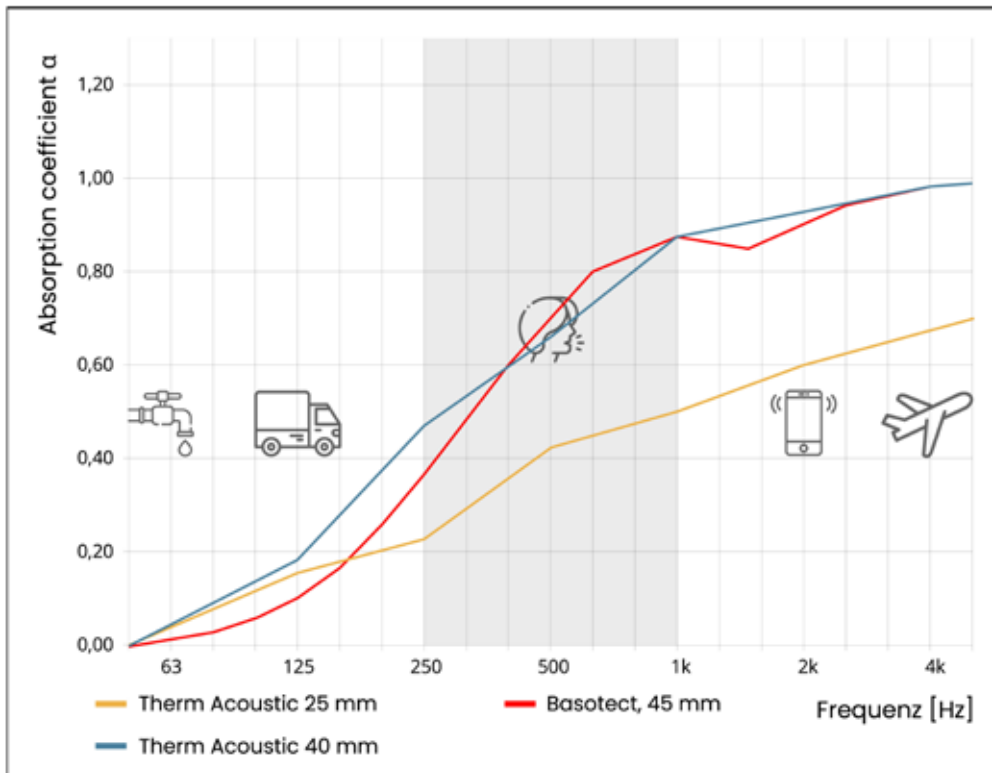

For framing a panel, with a depth of 30 mm.

All our profiles have a white label product sheet. Download it from the product page.

ACOUSTICS

Good acoustics are becoming increasingly important in creating a pleasant living and working space. Poor acoustics can be extremely tiring, and noise pollution for a longer period can even harm your health. By placing acoustic material in a frame, you improve the acoustics in a room. Annoying sounds such as reverberation, echoes and hollow sounds in a room are muffled, creating a peaceful (working) environment.

Acoustics

6.1 ABSORPTION VALUE

The quality of an acoustic material is determined by its absorption value. This value indicates how much sound is absorbed. The most ideal value is 1, which corresponds to 100% absorption. The area marked in grey is the speech area; this is usually the focus for an average room.

Basotect®

Very light and rigid acoustic material with a high absorption value.

- ✓ 45 mm
- ✓ Fire class B1

Therm Acoustic

A 100 percent recyclable acoustic material with a good absorption value.

- ✓ 10, 25 and 40 mm
- ✓ Fire class B1
- ✓ Recyclable
